NOFLY WP is a powerful biological insecticide for use in commercial poultry houses, livestock barns, & animal housing application against Litter Beetles (Darkling, Hide and Carrion), Northern Fowl Mites, Red Poultry Mites, Moths and Gnats

NoFly WP is a microbial bioinsecticide containing a high concentration of the fungi *Isaria fumosoroseus FE 9901*. When applied this powerful organism contacts the pest, attaches itself to the body, germinates and kills the target. Afflicted insects will stop feeding within 24 hours and die in 5-7 days.
Use of NoFly WP will not harm animals, livestock or beneficial insects (including honey bees), is labeled for organic use and has a 0-day pre-harvest interval.
NoFly WP is a safe and effective tool to add to your pest management program.

NoFly WP is effective against:

* Litter beetles
* Mites
* Moths
* Gnats
* Whiteflies
and other pests

Above: *Beetle infected with Isaria fumosoroseus FE 9901*

OMRI® LISTED
